

What's That Smell?

Information on Toxicology, Environmental Health, and Chemicals

Thursday, June 23, 2005

9:00 a.m. - Noon

Middletown Library Service Center

(directions to the Service Center are at <http://www.cslib.org/facmlsc.htm>)

The instructor for this class is **Donna Berryman**, Outreach Coordinator for the National Network of Libraries of Medicine, New England Region.

This free hands-on training program is for reference librarians who work in public libraries and are confronted with consumer questions related to environmental health and hazardous substances and chemicals. There will be a review of several National Library of Medicine informational databases on toxicology, environmental health, and chemicals, including: ToxTown, Household Products Database, Hazardous Substances Data Bank, and HazMap. The program will help answer questions such as: I heard that spray air fresheners shouldn't be used in homes. Are they safe? What are the short and long term effects of exposure to the chemical formaldehyde? A company in my neighborhood releases something in the air that has a bad smell. Is there anyway I can find out what is causing this odor and if it is toxic?

To register for this class, complete the registration form below and mail to:

Healthnet - Toxicology
Health Center Library
University of Connecticut
PO Box 4003
Farmington CT 06034-4003

Or fax to 860/679-1230
Attention: Healthnet

Registration deadline: June 17, 2005
Register early! Seating is limited.

Your email address (printed neatly) if you want confirmation: _____

NAME(S) _____

LIBRARY _____

ADDRESS/TOWN _____

TELEPHONE NUMBER _____

(a telephone number where you can be reached the evening before
or the early morning of the workshop in case we have to cancel or postpone)
